Top Fitness Challenges

Top Frustrations with Fitness Apps

Fitness App Frustrations

Survey Findings Support FitStart.

- Most users struggle with consistency — FitStart's habit tools address this directly.
- Users overwhelmingly want adaptive apps (85%) — our core feature is validated.
- Simple UI + free access = the winning formula our competitors are missing.
- Structured tracking and progress visualization must be front and center.
- Both personas are well-represented in the survey data — we're building for real users.
