85%

said YES to using a fitness app  
that adapts to their fitness level

*72 of 85 respondents*

## ADOPTION INTENT BY FITNESS LEVEL

### Beginner

88% would adopt

### Intermediate

81% would adopt

### Advanced

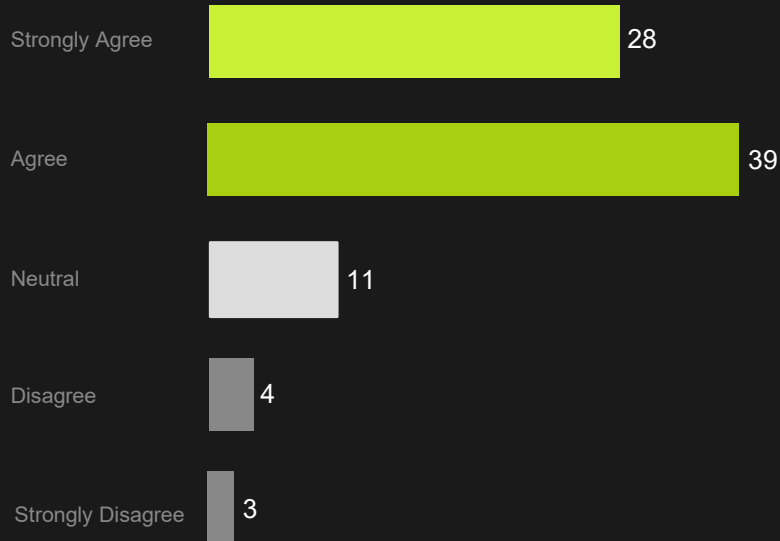

90% would adopt

*Strong validation for FitStart's core adaptive concept across all experience levels.*

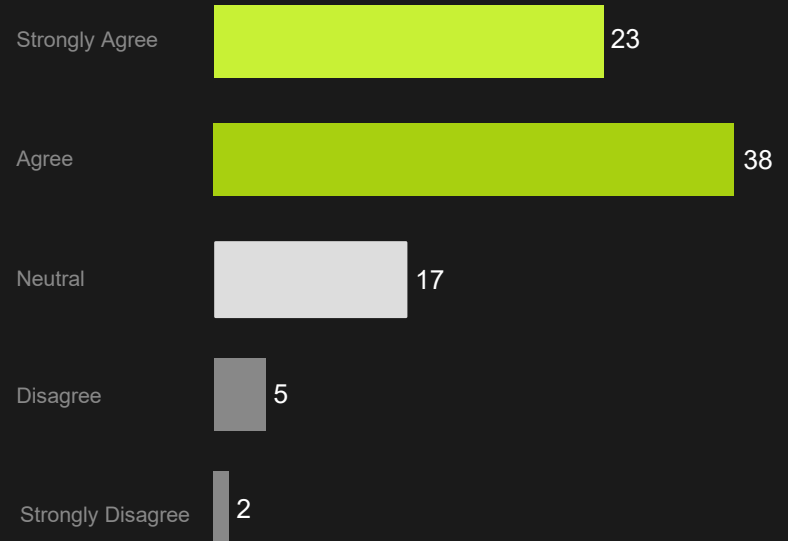

# UX & Interface Preferences

*"A simple, easy-to-navigate interface is important to me."*

**79% value simplicity**

*"I'm more likely to continue using an app that provides regular feedback."*

**72% want regular feedback**

# Key Insights & Recommendations

1

## Prioritize Simplicity

79% want an easy-to-navigate interface. Complexity is the #2 frustration. FitStart must have a clean, minimal UI.

2

## Make Core Features Free

Paywalls are the top frustration (22.5%). A free tier with good and essential features will drive adoption and retention.

3

## Focus on Progress Tracking

Structured tracking + progress visualization are the top-ranked features. This is FitStart's core differentiator.

4

## Target the 18–27 Majority

61% are 18–22, 27% are 23–27. Design for a young, smartphone-first audience balancing school, work, and fitness.

**FitStart is validated — build it simple, affordable, and progress-focused.**

# Survey Validates Our Personas

## PERSONA 1 — Adam Ali Intermediate Fitness Enthusiast, 25

### Confirmed by survey:

- 48% identify as intermediate level
- Structured tracking is the #1 wanted feature
- Progress visualization ranked #2
- Time management is a top challenge (45 mentions)
- Uses apps like Hevy, Strava, Apple Fitness

## PERSONA 2 — Daniel Murphy Weight Loss Beginner, 29

### Confirmed by survey:

- 27% identify as beginners
- 88% of beginners want an adaptive app
- Gym intimidation has 28 mentions
- Beginners rank beginner workout guidance as top feature
- Paywalls & complexity are top frustrations (12 out of 27 mentions)

## Conclusion

# Survey Findings Support FitStart.

85 respondents · Feb 2026

## The data is clear:

Most users struggle with consistency — FitStart's habit tools address this directly.

Users overwhelmingly want adaptive apps (85%) — our core feature is validated.

Simple UI + free access = the winning formula our competitors are missing.

Structured tracking and progress visualization must be front and center.

Both personas are well-represented in the survey data — we're building for real users.
